(B) Guide to clean water pump

1. Switch off the water pump power supply.

2. Lift up the green color container one side at a time and insert support to lift it up (as shown in photo).

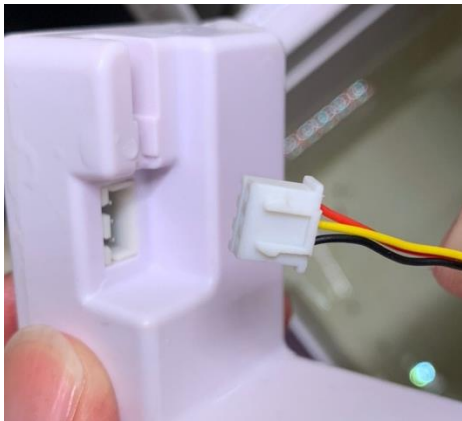

1. Use screwdriver to remove all 3 screws

1. Pull the water pump housing up

1. Remove power plug from the container.
2. Remove connector from the pump housing.
3. Take out the pump (black color) from the housing.

1. Pull open the water pump

1. Wash it clean with brush.
2. Flush water through the inlet (arrow pointed) and make sure water flow through properly.
3. Fix back after cleaning.
4. Finger-tip tight when screwing back screws. **Too much force will break the plastic.**

NOTES:

Make sure the connector does not touch water. If touches water, clean it dry
