(B) Guide to Vermiculite

Vermiculite can recycle for 1-2 times before change.

DO NOT WASH VERMICULITE

Option 1:

- a. Remove vermiculite with algae
- b. Remove as many roots as possible as roots will decay and affect plants growth

Option 2:

- a. Pour vermiculite into tray.
- b. Spread it out and place it under sun to dry for 2 weeks. Purpose is to kill germs, bacteria and algae.
- c. After 2 weeks, place vermiculite into planting pot. If not enough, add some add vermiculite.

Option 3:

- a. Replace with new vermiculite

(C) Guide to Absorbent Sticks

Absorbent sticks can recycle until worn out.

Pull out absorbent sticks and RINSE it. DO NOT WASH. Dry and insert it back from the bottom using push and turn motion.

(D) Guide to Base Paper

Base paper can be washed. If worn out, replaced with facial cotton.

(E) Guide to Planting pots and container

Both planting pots and container can be washed after each harvest. Remove vermiculite, absorbent sticks and base paper before washing planting pots.
