## (B) Guide to clean water pump

1. Switch off the water pump power supply, water will flow back to the last tray.

2. Prepare a pail or container to hold the water.

3. Remove the water pump and let water flow.

4. Use a stopper (like pen) to block the water from flowing out.

5. Remove the water pump.

6. Use a "+" screwdriver to remove the screws.

7. Use a minus screwdriver to pry out the white color propeller. Do not break it.

8. Use toothbrush to brush it clean.

9. After washing, put back the cover. **Make sure the white rubber seal sits inside the groove of the cover.**

10. Make sure the cover sit complete before screw back the screw in the indicated sequence.

11. Use “+” screwdriver to screw back as shown in the photo.

12. Put back the cleaned pump.

13. Remove the stopper and put the pump into it.

14. Switch on the power supply.
